THE PROBLEM

Getting to class at OU is harder as more students compete for limited parking.

Sources: OU Daily (Sept. 2022); OU Institutional Research (Fall 2026); News 9 (Oct. 2022). Details on the next slide.

01

Limited parking

Commuter permits outnumbered commuter spaces in 2022–23.

02

A growing campus

33,307 students on the Norman campus this fall.

03

Late or missed class

One student told News 9 that parking trouble made him miss class.

The evidence

7,490

commuter permits sold for 2,758 commuter spaces, 2022–23

OU Daily, Sept. 2022

WHAT IT MEANS

Not everyone parks at once, but it shows how tight commuter parking can get.

Tip 8

of OU Athletics' 11 game day travel tips: carpool.

Via News 9, Aug. 24, 2026

WHAT IT MEANS

"Fewer vehicles on the road help improve traffic flow and parking availability for everyone."

33,307

students on OU's Norman campus, Fall 2026.

OU Institutional Research, Sept. 14, 2026

WHAT IT MEANS

More students means more people trying to reach the same campus each day.

6,437

freshmen this fall: OU's largest class, sixth straight record

OU News, Aug. 23, 2026

WHAT IT MEANS

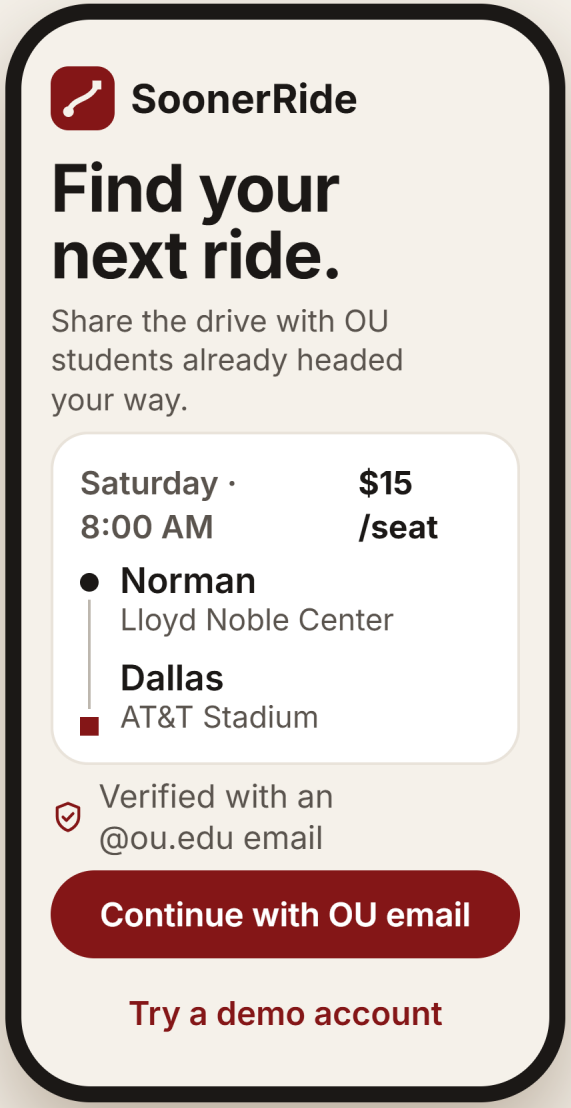

Each class is bigger than the last, so the student body keeps growing.

THE SOLUTION

Sooner Ride

Sooner, together

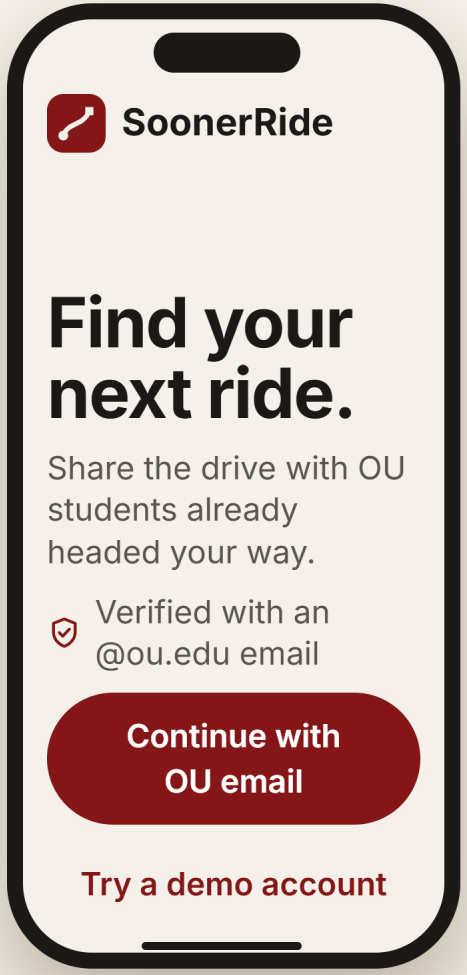

A carpool app where verified OU students post trips, find rides and travel together.

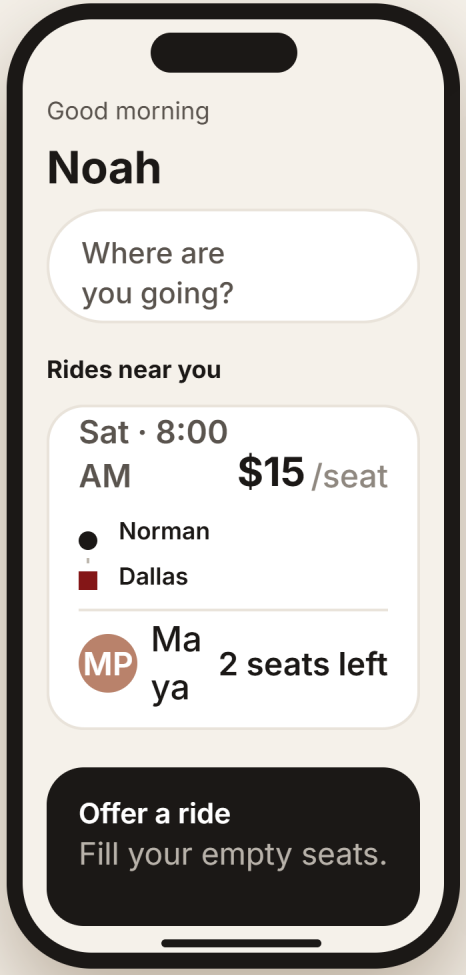

Screen from the live Sooner Ride app. The trip shown is sample data.

How it works

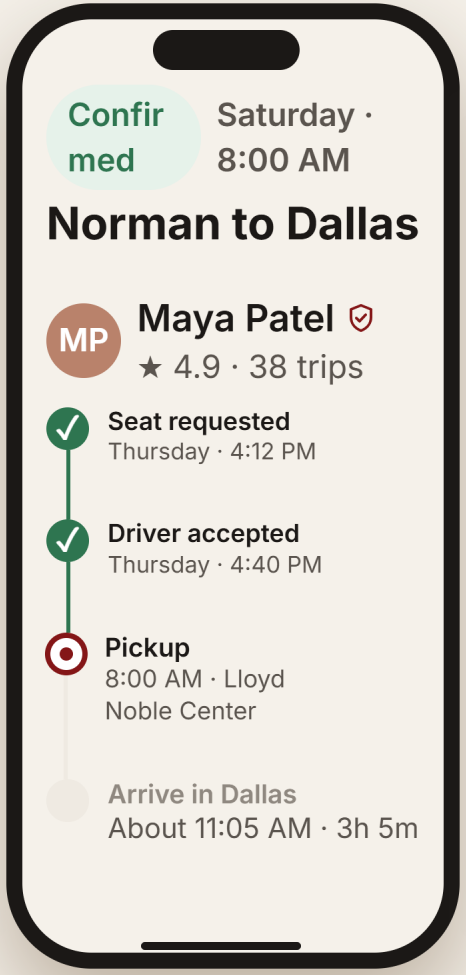

1 Sign in

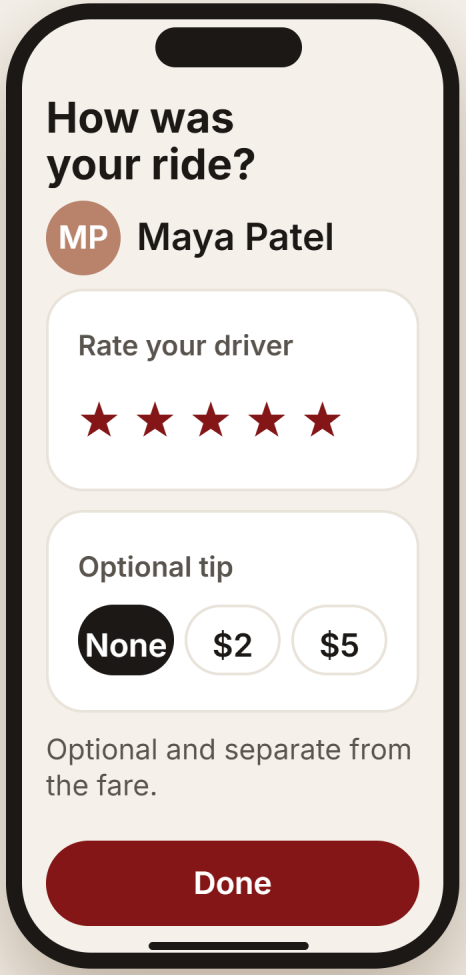

2 Find or offer a ride

3 Request and confirm

4 Tip and rate

Live demo

One app, every trip

EVERY WEEK

Class schedule

Set a weekly ride once for your classes, then offer or request seats on the days you need them.

EVENTS

Game day and the State Fair

Open a circle for OU–Texas weekend or the State Fair, so friends fill the car and share the drive.

ERRANDS

Target or Walmart

Post a quick request for a Walmart or Target run and split the trip with a neighbor who is going anyway.

HEADING HOME

Dallas, Tulsa and nearby cities

Find a ride home for breaks and weekends, or offer your empty seats to classmates heading the same way.

Example uses. The daily campus commute is our first pilot focus.

Incentives

FOR RIDERS

Low-cost rides
Gas shared across the seats

Avoid driving
Skip the commute and the parking hunt

Share the ride with a fellow Sooner
Meet students headed your way

FOR DRIVERS

Designated carpool commuter parking
Proposed, needs OU approval

Tips
Optional, separate from the fare

Helping a fellow Sooner ride
Fill your empty seats

Expected impact

01
Fewer solo trips

Fewer cars hunting for a spot.

Pilot tracks: solo trips replaced

02
Lower emissions

About 400 g CO2 saved per avoided mile (EPA).

Pilot tracks: shared miles

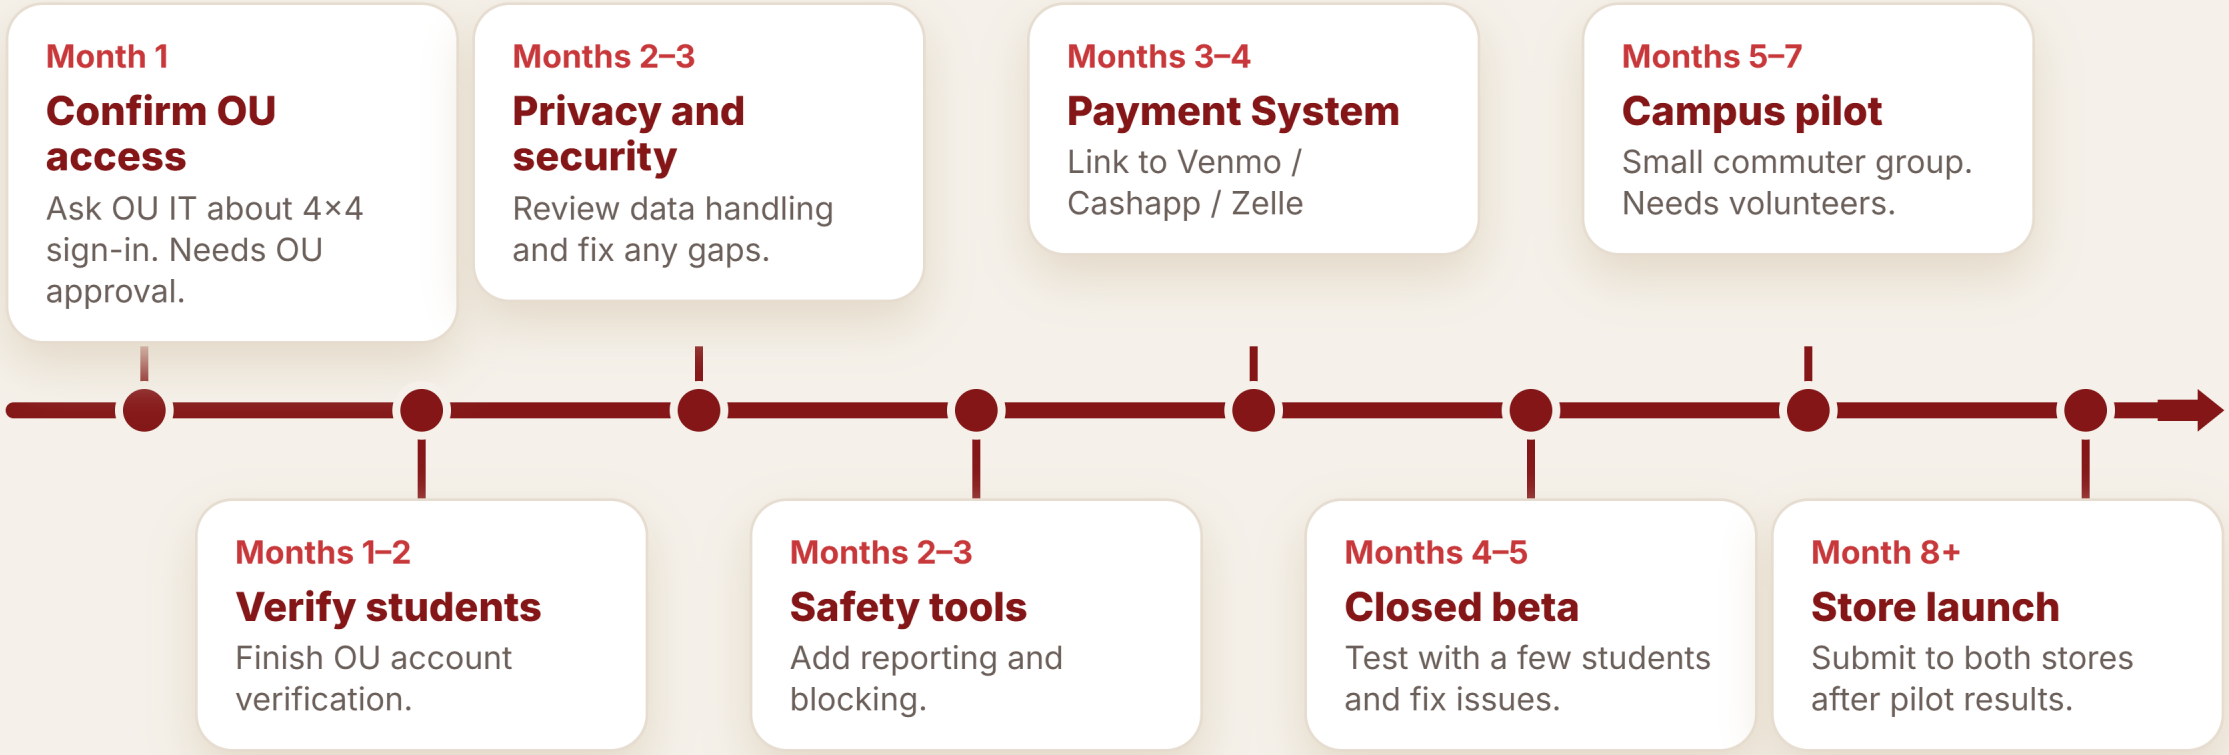

03
Sooner community

Students helping students, every week.

Pilot tracks: repeat rides

Transport and parking is known to be the most pressing problem within the student body.

Pilot plan

Durations are planning estimates. OU approval, payment processor approval and volunteers are unconfirmed dependencies.

Budget: store fees and operating costs

Store fees (USD)

Apple Developer Program	**$99 / year**
Google Play Console	**$25 one time**
Year one, both stores	**$124**
From year two	**$99 / year**

Operating costs (estimates)

Hosting Vercel Pro platform fee	**≈ $20 / month**
Maps Mapbox mobile maps free tier	**$0 up to 25,000 users**
Insurance Median general liability, Insureon	**≈ $45 / month**
Total, year one $780 operating + $124 store fees	**≈ $904**

USD, checked Oct. 24, 2026. Operating figures are rough estimates; sources in the appendix.
